

SOCIAL INSURANCE 2.0

Insurance as a unifying
means to underwrite
and secure social
mobility, and redefine a
sustainable social
contract for the 21st
Century

THE VISION

The guiding mission of The Commonwealth is to create an engine for social capital to thrive. To define a set of group insurance policies, social-good investment funds, and a model for open education accreditation and job seeking that aims to return value to network members from its pursuit of socialcapitalism.

The vision is... a decentralized society oriented bottom-up. A nation of all, unified by the commons.

Pipedream? No.
A model & a plan.

THE COMMONWEALTH

Capital Model

A DAO operated economy of assets supporting a decentralized Fiat asset.

DID + DAO

Citizen DID enables access to network services, first of which is Governance.

DID Social Good

DID & Reserve powered group insurance, social-good investments, and open education and hiring services to create an engine for social capital to thrive.

Fiat Expansion

A currency is only a currency if its being used for commerce. Vendor and marketplace expansion will remain a continued focus, and monetary policy will define and aim to maintain stability targets to see it used for the utility it aims to service.

THE CHALLENGE

This model has 0 merit without people, and early members and thought leaders of the network will make or break its success.

This means that for the moment, the biggest challenge is simple: we need YOU.

Given this project is brand new, all skills are currently needed. What's needed more than skills though, is simply a capacity to dream of a better world, and the conviction to believe that *together*, we can build it.
